Texture is key with an understated palette. For drapery, linens and upholstery, employ subtle understating monochromatic patterns to add depth and interest.

Employ the power of paint to transform your interiors to the Traditional Tailored aesthetic. Best as used, these colours are refined: quiet tints of grey, tan and blue contrast with charcoal, indigo, black and white.

A Tailored home shines beautifully with dramatic lighting, from larger scale pendant lights to graphic sconces in handsome dark woods and metals.

Tile and floral wallpaper add luxury to Tailored spaces. Opt for timeless tone elegance or go graphic and glamorous with black and white designs.

Diamond, checkboard and basketweave designs channel this theme's love of classic patterns. Use tile to integrate this defining element into your Traditional home.

DECORATING 101

LET'S GET IT DONE

Whether freshening up with paint or decorating from scratch, our project planning guide equips you with tools and tips to renovate and rejuvenate with confidence.

plan a room checklist

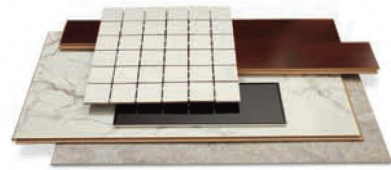

- DETERMINE YOUR NEEDS**
Think about how you want your room to function – and write it all down.
- FIND INSPIRATION** Collect images that inspire you and create a scrapbook or folder. Keep it in one place.
- DISCOVER YOUR STYLE** Be true to your taste. At homedepot.ca/discoverystyle we help you find your hidden and not-so hidden Traditional, Eclectic or Contemporary styles.
- PICK YOUR PALETTE** Whether calm, cool or electric, you'll find the season's most inspirational trend colours online at homedepot.ca/designcentre
- CHOOSE YOUR FLOOR**
Considering rugs over wood or stone beside laminate? Make inspired decisions with help from our online Buying Guides at homedepot.ca/buyingguides
- LIGHT YOUR LIFE** As a rule, rooms need four types of lighting – ambient (overhead), task, accent and decorative – to function well and look fabulous.
- FOCUS YOUR VIEW**
Colour, texture, personality: A smart mix of hard and soft window coverings adds serious design savvy to any space.
- FINE TUNE YOUR FINISHES** Hardware is like jewellery, highlighting the fashion of a room; make it elegant but never boring.
- ACCESSORIZE** Set aside some budget for the fun stuff. After all, accessories truly finish off a space and express your style point of view.

flooring explore your options

Great flooring decisions lay the groundwork for satisfying, high-style makeovers and renovations.

- **Hardwood:** This classic adds value to your home. It's a natural insulator, is easy to clean and, with proper maintenance, lasts for years.
- **Laminate:** This easy-to-maintain flooring comes in an exploding range of wood looks and patterns. Tongue-in-groove, it also suits savvy DIYers.
- **Vinyl:** Easy-to-install vinyl flooring offers embossed and textured stone, ceramic and wood effects that look as good as the real thing but carries a more budget-minded price tag.
- **Ceramic tile:** Great for high-traffic and moisture-prone zones, ceramic wears well, resists stains and is ideal for radiant-floor heating installation.

At homedepot.ca/designcentre, our Buying Guides offer a wealth of information to help you choose the right flooring to suit your lifestyle.

what size should your area rugs be

The general rule for selecting the perfectly proportioned area rug is to allow for a perimeter of about 12 to 14 inches all around the room; up to 18 inches if you're furnishing a very large space. Visually, this creates a handsome border. If the rug is too small, the proportions feel awkward.

the finish line

You've chosen your next knockout paint colour but do you opt for a flat or high-gloss finish? Check our chart for the tried-and-true approach.

THE PAINT	BEST USED FOR
Flat	Low-traffic rooms that don't require a lot of cleaning, such as bedrooms; masks flaws so is great for old walls.
Eggshell and satin	High-traffic zones such as living rooms, kids' rooms and bathrooms; easily cleaned with a damp cloth.
Semi-gloss	Windows, doors, trims and banisters, and kitchen cabinetry, also moisture-prone areas such as bathrooms.
High-gloss	Trims, furniture and cabinetry. Every flaw shows because of its reflective quality so prep meticulously.

wall & trim combos

Elegant walls with light trim is timeless, but mix it up. Flip to light with dark, go floor-to-ceiling tonal, or give the super-shine treatment to a baseboard for extra glamour.

how much wallpaper?

1. Measure the perimeter of your room.
 2. Measure the height of your walls and multiply the height of the walls by the perimeter to calculate your room's square footage.
 3. Divide your room's square footage by the square footage of each roll of wallpaper (20-25 sq. ft. per roll). By this calculation, a 15' x 15' room with a ceiling height of 8' is 480 sq. ft. $(15 \times 15 + 15 \times 15) \times 8$ divided by 25.
- The room would require 19.2 or 20 single rolls – always round up. Remember: Add 10-20% more wallpaper if you have a pattern that needs to be matched up. Let us make it easy for you. Visit homedepot.ca/wallpapercalculator

lighting FAQs

The right light fixture helps define the mood at your dinner table. Gauging how high to hang your chosen design is important, as is scale – too small is a bore and too large can overwhelm. To determine the ideal size, measure your room and add the length and width together. For example, in a 10x12 ft. room, 10+12=22; meaning your fixture should be approximately 22 inches in diameter. As for how high to hang that chandelier above your table: Aim for 30-34 inches.
